

**FARAM**

# Sirio

This range of operator chairs uses sophisticated mechanisms for the seat and back adjustment (synchro, tilting tension control, asynchro). The various models guarantee a high level of comfort and comply with the D.Lgs. 626/94 standards. The back is in a wide range of heights.

Operative chair with high, medium-high or low back, has several adjustment mechanisms according to the model. The chair is stuffed with cold-pressed polyurethane, has 5-ray black polypropylene base with self-braking safety castors and polypropylene arms.

The chair can be with fixed base with 4 legs or with slide in lacquered steel and adjustable back height. 2-seat bench, lacquered steel frame, feet and columns in lacquered aluminum, cold-pressed polyurethane padding.

Faram can introduce modifications for the improvement of the product without prior notice. Finishes to be referred to Faram dedicated information.
